## OBJECTIVE

---

Results-oriented Computer Science student and strong problem solver with hands-on experience in developing full-stack applications. Seeking a Software Developer role to apply my technical skills in building efficient and scalable software solutions.

## EDUCATION

---

**B.Tech – Computer Science Engineering** 2023 – 2027

United College of Engineering and Research, Prayagraj — CGPA: 7.0/10 (till 5th Sem)

**Senior Secondary (CBSE)** 2021 – 2022

Allahabad Public School, Prayagraj — 80.6%

## SKILLS

---

|                       |                                                            |
|-----------------------|------------------------------------------------------------|
| Languages             | Python, JavaScript (ES6+), SQL                             |
| Frontend              | React, Tailwind CSS, HTML5/CSS3, React Router              |
| Backend & AI          | Node.js, Gemini API, IoT                                   |
| Databases & Platforms | Supabase (Postgres), Firebase, Git/GitHub, Render, Netlify |

## PROJECTS

---

**Codnite – Competitive Coding Platform** — [\[GitHub\]](#) — [\[Live Demo\]](#)

- Contributing as Technical Lead on a full-stack coding platform for Indian college students featuring real-time 1v1 battles, college vs college competitions, and a social feed.
- Built on React, Node.js, MongoDB, Socket.IO, and Redis with Docker-based code execution and a recruiter dashboard for campus hiring.

**Arohan – Autonomous Campus Safety System (Finalist, IIT Bombay Techfest)** — [\[Report\]](#) — [\[Live Demo\]](#)

- Integrated MPU6050 gyroscope with a P-controller on an autonomous rover for real-time hazard verification and stable trajectory maintenance.
- Built a multi-sensor fusion pipeline (MQ-135, MQ-2, Temperature) with weighted hazard scoring via ESP32 Wi-Fi to Firebase, achieving 8.4s response latency and 90% reduction in manual verification delay.

**EcoBin – IoT Smart Waste Management System** — [\[GitHub\]](#) — [\[Live Demo\]](#)

- Built an end-to-end IoT waste management solution with a real-time admin dashboard (JavaScript, Firebase) for live bin monitoring and data visualization.
- Developed a companion Android app providing workers with GPS-based optimized collection routes.

**MailExtracto – Intelligent Automation Bot (Top 10 Finalist, IIT Bombay)** — [\[GitHub\]](#) — [\[Live Demo\]](#)

- Built an intelligent automation pipeline using Datamatics TruBot and TruCap+ to extract structured data from emails, earning Top 10 recognition at IIT Bombay Techfest 2024.

## LEADERSHIP & ACHIEVEMENTS

---

- Certificate of Excellence (Special Category – Best Hardware Solution), HackDiwas 2026 Grand Finale
- Top 10 Team Recognition, Techfest IIT Bombay 2024
- Project Tech Lead, Full Waste Management System (Coordinated development of a 3-part system)
